

A1.a

Paper templates to be cut out to plan the cutting of the cooker parts.
(Scale 1:10)

A1.b

Hints to plan the cutting

Step 1:

Cut as many paper templates as needed to scale 1:10. There is a master copy in appendix A1.1 of the construction manual (you will need more than one copy).

Step 2:

Position the model templates (scale 1:10) as economically as possible onto the model plates (see master copy in appendix A1.1).

If in doubt, add up all the measurements as given on the cooker parts to avoid any mistakes.

A1.2 shows one of several possible arrangements of the parts on the metal sheets.
